Quality Assurance

Work Order System

## The Kleen-Tech Family of Companies

a cleaning company that is  
just the right size for you

## not too big, not too small

As a company with more than 1,800 employees nationwide, Kleen-Tech is large enough to supply our clients with the processes, tools, and solutions that even the largest firms envy, but small enough to maintain personal working relationships, ensuring each client's trust and satisfaction.

Kleen-Tech provides you with a local team of experienced leaders and janitorial personnel, supported by a collection of state-of-the-art customer service-focused technology. Our suite of solutions includes a 24/7/365 communications center staffed in-house by our industry-knowledgeable, multilingual staff, our fully customizable SHARP® work order system—the industry's very best quality control and event management systems—as well as KRONOS® real-time labor management.

As a truly valued client, you always have a direct hotline to senior leadership and benefit from the latest industry advances that consistently meet your custodial objectives.

*"Kleen-Tech's focus on continuous improvement and enhanced efficiency creates true partnerships. When we came under economic pressure, Kleen-Tech worked with us to revise custodial services to meet our specific needs and budget."*

- Customer, Texas

*"I highly recommend Kleen-Tech as a high-quality, world-class janitorial service provider to clean any facility up to and including facilities over a million square feet. I know from experience they are uniquely qualified to perform these jobs from their start-up procedures, to hiring and training, to managerial oversight."*
